SOFTWARE VERSION 2.4 - NEW RELEASE

The new Zipwake Series S Software Version 2.4 incorporates 4 major improvements and as always a few smaller enhancements in pursuit of perfection.

MULTI LANGUAGES

The **CP-S control panel** now provides a selection of 15 languages with three new languages: **Russian**, **Japanese** and simplified **Chinese** in the following order:

1. Dansk	9. Polski
2. Deutsch	10. Russian
3. English	11. Suomi
4. Español	12. Svenska
5. Français	13. Türk
6. Italiano	14. Chinese
7. Nederlands	15. Japanese
8. Norsk	

The multi-lingual control panel is accompanied by new versions of the **Operator's manual, Revision R3A**, now covering a total of 13 languages. The same apply to the system's **Installation Guide**. The current languages are:

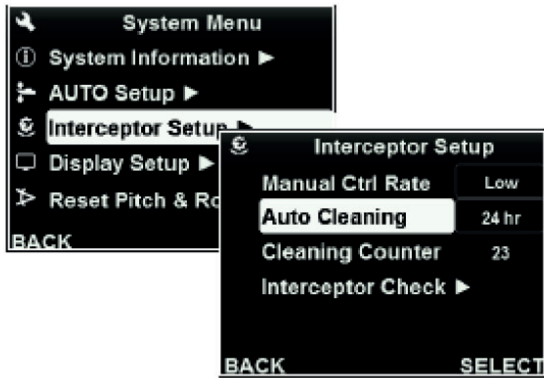

1. English	8. Russian
2. Finnish	9. Spanish
3. French	10. Swedish
4. German	11. Turkish
5. Italian	12. Chinese
6. Norwegian	13. Japanese
7. Polish	

They can all be readily downloaded from www.zipwake.com on a format easily printed on home printers.

AUTO CLEANING

A new function for boats that stay in the water for long periods. Fouling on the insides of the interceptors is prevented by periodically moving the blade in-and-out.

SELECTABLE MANUAL CONTROL RATE

Now the relationship between the turning rate of the control wheels and the interceptors' actuation speed can be adjusted from low to high in manual mode.

INTERCEPTOR SETUP

A new top-menu line has been added. In the sub-menu the two new functions are found together with Interceptor Check which has been moved from the Advanced menu.

More on the new functions can be found in the Operator's Manual, Revision R3A, now available on the website in 13 languages.

SYSTEM UPGRADE

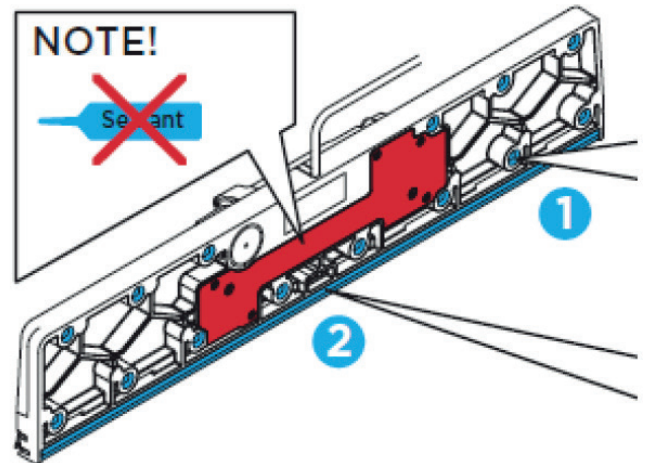

Download the software upgrade file from www.zipwake.com and copy it to the root of a high quality USB memory stick. Then refer to the Operator's Manual Section 16 and follow the remaining steps.

INSTALLATION GUIDE - NEW RELEASE

A new release of the Installation Guide, Revision R1E, has also been published in 13 languages on the website. There are two notable improvements:

1. Notes have been added to stress not to overuse sealant.

2. On the large wiring diagram it is shown how to connect power in case the new Auto Cleaning function is to be used. Do not use automatic thermal or magnetic type of fuse in any case, as show by the new note above the battery connection options.
